

A Thank You from SADA Cavi

Our participation in the **SPS Italia trade fair in Parma**, held from **May 28th to May 30th, 2024**, was a great success.

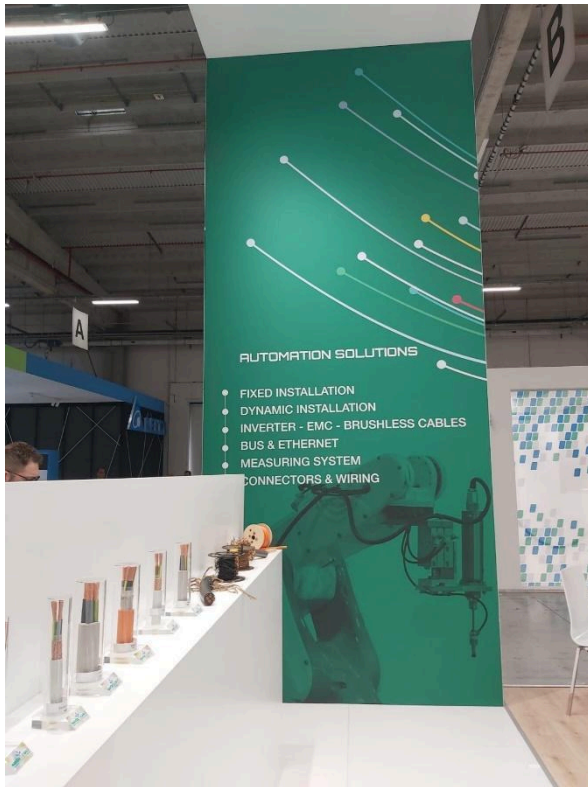

The event, a benchmark for the **automation industry**, gave us the opportunity to present our **technological solutions** and meet many **professionals from the sector**.

What happened at SPS Italia?

Our **SADA Cavi** stand attracted the attention of many visitors interested in discovering our products dedicated to automation and cutting-edge services such as **SADA LAB**.

Learn more about [SADA LAB](#)

During these three intense days, we were able to **discuss the latest technology trends**, showcasing our customised solutions and listening to the specific needs of our customers. This not only allowed us to establish new business relationships, but also to strengthen existing ones.

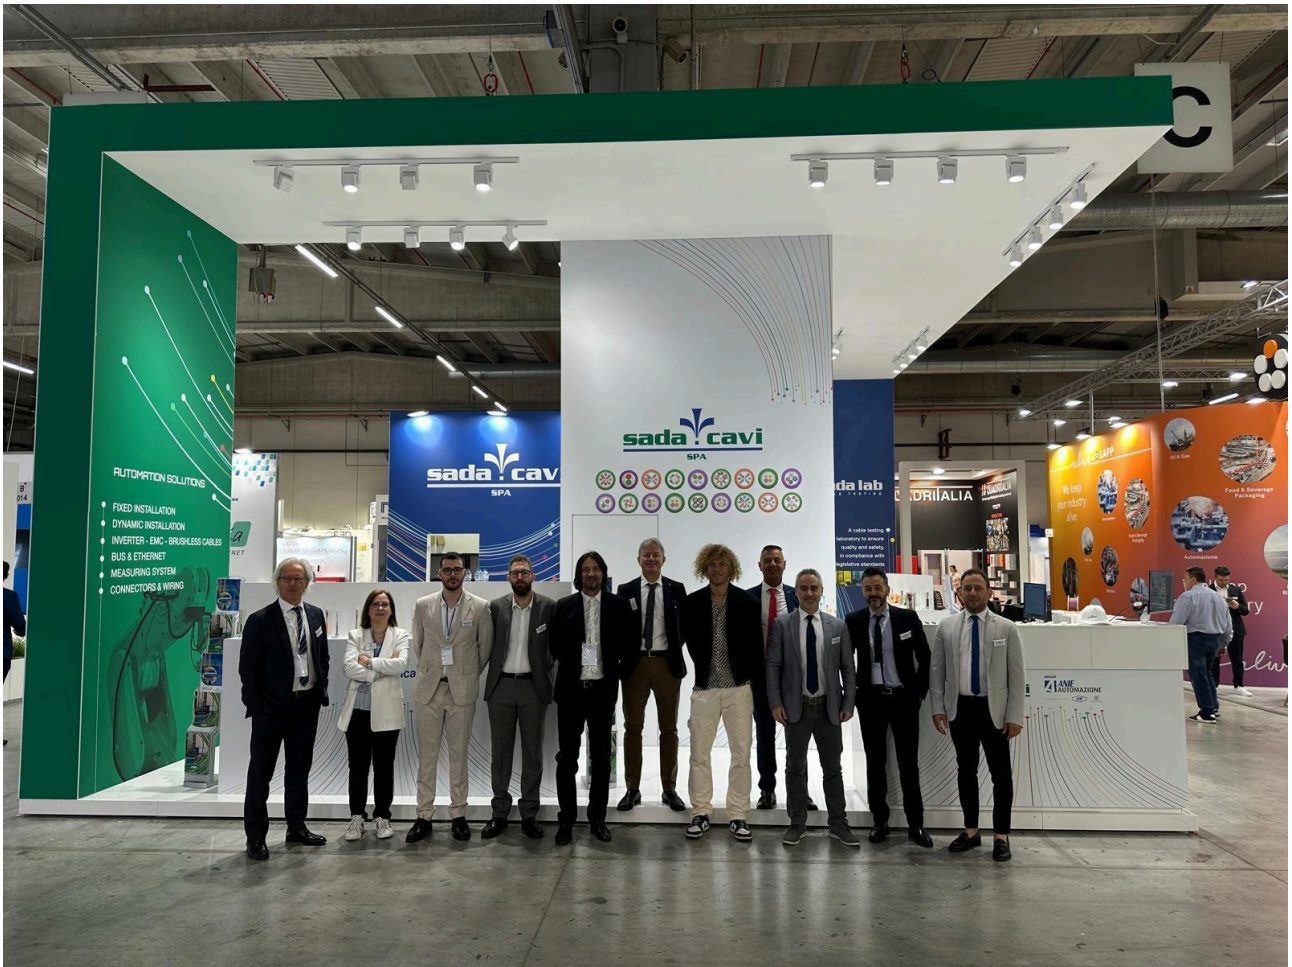

Trade fairs like SPS provide a unique opportunity to meet other professionals in the industry: the discussions and collaborations that arise in these contexts **accelerate innovation and business growth**.

Questions, curiosity and feedback have been a valuable source of inspiration for us and have enabled us to better understand the needs of the market.

A big thank you

The entire SADA Cavi team wishes to **sincerely thank** everyone who stopped by the stand.

Daniele Leonardi, Managing Director of SADA Cavi, would like to say a special thank you: "Many thanks to all the visitors who took the time to visit us. It was a pleasure to meet so many industry professionals and share our passion for automation with you. Your presence confirmed the importance of our commitment to offering high-quality solutions and motivates us to continue on this path."

See you at the next edition

The SPS trade fair in Parma is an important opportunity for us to grow and compare notes, and this year was no exception. **We are excited to continue working together with all the specialists in the sector to build the future of industrial automation.**

Thanks again to everyone and see you at the next edition!

The SADA Cavi team
